INDEX TO VOLUME 115

Alphabetical Table of Contents of Authors

ÅGREN, GÖRAN I. See GUNNAR EKBOHM
ALLOWAY, THOMAS M. The origins of slavery in leptothoracine ants (Hymenoptera: Formicidae), 247
ANGUS, ROBERT A. Geographic dispersal and clonal diversity in unisexual fish populations, 531
ARMSTRONG, ROBERT A., and RICHARD MCGEHEE. Competitive exclusion, 151

BERENBAUM, M. Adaptive significance of midgut pH in larval Lepidoptera, 138
BIRKS, H. J. B. British trees and insects: a test of the time hypothesis over the last 13,000 years, 600
BITTNER, G. D. See C. E. HULSEBOSCH
BOYCE, MARK S., and D. J. DALEY. Population tracking of fluctuating environments and natural selection for tracking ability, 480
BURLEY, NANCY. Clutch overlap and clutch size: alternative and complementary reproductive tactics, 223

CARACO, THOMAS. Stochastic dynamics of avian foraging flocks, 262
CASE, TED J. MacArthur's minimization principle: a footnote, 133
CHAPAIS, BERNARD. See STEVEN R. SCHULMAN
CHASE, IVAN D. Cooperative and noncooperative behavior in animals, 827
CHEN, S. S. See D. L. NANNEY
COBLENTZ, BRUCE E. On the improbability of pursuit invitation in mammals, 438

DALEY, D. J. See MARK S. BOYCE
DETHIER, V. G. Evolution of receptor sensitivity to secondary plant substances with special reference to deterrents, 45
DIAMOND, JARED M., and MICHAEL E. GILPIN. Turnover noise: contribution to variance in species number and prediction from immigration and extinction curves, 884

EBERSOLE, JOHN P. Food density and territory size: an alternative model and a test on the reef fish *Eupomacentrus leucostictus*, 492
EHRLICH, PAUL R., and RAYMOND R. WHITE. Colorado checkerspot butterflies: isolation, neutrality, and the biospecies, 328
EKBOHM, GUNNAR, TORBJÖRN FAGERSTRÖM, and GÖRAN I. ÅGREN. Natural selection for variation in offspring numbers: comments on a paper by J. H. Gillespie, 445
EMLEN, J. MERRITT. See CINDY B. PATTERSON

FAGEN, ROBERT M. When doves conspire: evolution of nondamaging fighting tactics in a nonrandom-encounter animal conflict model, 858
FAGERSTRÖM, TORBJÖRN. See GUNNAR EKBOHM
FERRIS, STEPHEN D., and GREGORY WHITT. Genetic variability in species with extensive gene duplication: the tetraploid catostomid fishes, 650
FIALA, KENT L. On estimating the primary sex ratio from incomplete data, 442
FRETWELL, STEPHEN D. See SIEVERT ROHWER

GERRITSEN, JEROEN. Sex and parthenogenesis in sparse populations, 718
GILPIN, MICHAEL E. See JARED M. DIAMOND
GROMKO, MARK H., KATHY SHEEHAN, and ROLLIN C. RICHMOND. Random mating in two species of *Drosophila*, 467

HAIRSTON, NELSON G. Species packing in the salamander genus *Desmognathus:* What are the interspecific interactions involved? 354
HALLETT, JAMES G. Niche width and genetic variation in *Drosophila* reexamined, 594
HARTL, D. L. See D. J. HOWELL
HEED, W. B. See M. P. KAMBYSELLIS
HENDRIX, STEPHEN D. An evolutionary and ecological perspective of the insect fauna of ferns, 171
HILL, G. J. C. See G. L. STEBBINS
HIXON, MARK A. Food production and competitor density as the determinants of feeding territory size, 510
HOWELL, D. J., and D. L. HARTL. Optimal foraging in glossophagine bats: when to give up, 696
HULSEBOSCH, C. E., and G. D. BITTNER. Evolution of abilities to regenerate neurons in central nervous systems, 276

INGER, ROBERT F. Densities of floor-dwelling frogs and lizards in lowland forests of Southeast Asia and Central America, 761
INOUYE, RICHARD S. Stabilization of a predator-prey equilibrium by the addition of a second "keystone" victim, 300

JAAFAR, ZARINAH. See D. J. WOODLAND
JEFFERY, DUANE E. See MONTE E. TURNER

KAMBYSELLIS, M. P., T. STARMER, G. SMATHERS, and W. B. HEED. Studies of oogenesis in natural populations of Drosophilidae. II. Significance of microclimatic changes on oogenesis of *Drosophila mimica*, 67
KNIGHT, MARY-LOU. See D. J. WOODLAND
KREBS, JOHN R. Flocking and feeding in the great tit: a reply to Baker, 147
KRUCKEBERG, JOHANNA F. See ELIOT B. SPIESS

LAYZER, DAVID. Genetic variation and progressive evolution, 809
LAZARUS, JAN. See JOHN VANDERMEER
LEE, DAVID W., and J. BRIAN LOWRY. Solar ultraviolet on tropical mountains: Can it affect plant speciation? 880

LLOYD, MONTE, and JOANN WHITE. On reconciling patchy microspatial distributions with competition models, 29
LOMAN, JON, and STAFFAN TAMM. Do roosts serve as "information centers" for crows and ravens? 285
LOWRY, J. BRIAN. See DAVID W. LEE
LUDWIG, CRAIG. See JOHN VANDERMEER
LYON, JOHN. See JOHN VANDERMEER

MCGEHEE, RICHARD. See ROBERT A. ARMSTRONG
MCKEY, DOYLE. Origins of novel alkaloid types: a mechanism for rapid phenotypic evolution of plant secondary compounds, 754
MEYER, E. B. See D. L. NANNEY

NANNEY, D. L., D. NYBERG, S. S. CHEN, and E. B. MEYER. Cytogeometric constraints in *Tetrahymena* evolution: contractile vacuole pore positions in nineteen species on the *Tetrahymena pyriformis* complex, 705
NILES, DAVID M. See SEIVERT ROHWER
NUNNEY, LEN. The stability of complex model ecosystems, 639
NYBERG, D. See D. L. NANNEY

OHTA, ALAN T. Coadaptive gene complexes in incipient species of Hawaiian *Drosophila*, 121

PATTERSON, CINDY B., and J. MERRITT EMLEN. Variation in nestling sex ratios in the yellow-headed blackbird, 743
PAYNE, ROBERT B. Erratum, 149
PIANKA, ERIC R. See JOS. J. SCHALL
PIEROTTI, RAYMOND. Spite and altruism in gulls, 290
POUGH, F. HARVEY. The advantages of ectothermy for tetrapods, 92
POWELL, ROGER A. Stability in a one-predator–three-prey community, 567

REAL, LESLIE A. Fitness uncertainty and the role of diversification in evolution and of behavior, 623
REGAL, PHILIP J. See ROBERT J. TAYLOR
RICHARDS, DOUGLAS G., and R. HAVEN WILEY. Reverberations and amplitude fluctuations in the propagation of sound in a forest: implications for animal communication, 381
RICHMOND, ROLLIN C. See MARK H. GROMKO
ROHWER, SIEVERT, STEPHEN D. FRETWELL, and DAVID M. NILES. Delayed maturation in passerine plumages and the deceptive acquisition of resources, 400

SCHALL, JOS. J., and ERIC R. PIANKA. Evolution of escape behavior diversity, 551
SCHULMAN, STEVEN R., and BERNARD CHAPAIS. Reproductive value and rank relations among macaque sisters, 580
SCHULTZ, BRIAN. See JOHN VANDERMEER
SEARLES, RICHARD B. The strategy of the red algal life history, 113
SEIB, ROBERT L. Baja California: a peninsula for rodents but not for reptiles, 613
SHEEHAN, KATHY. See MARK H. GROMKO
SMATHERS, G. See M. P. KAMBYSELLIS

SPIESS, ELIOT B., and JOHANNA F. KRUCKEBERG. Minority advantage of certain eye color mutants of *Drosophila melanogaster*, 307

STAMP, NANCY E. Egg deposition patterns in butterflies: Why do some species cluster their eggs rather than deposit them singly? 367

STARMER, T. See M. P. KAMBYSELLIS

STEBBINS, G. L., and G. J. C. HILL. Did multicellular plants invade the land? 342

SWEENEY, BERNARD W. See ROBIN L. VANNOTE.

STEINER, WILLIAM W. M. On niche width and genetic variation, parametrical problems, and gene pool differentiation in *Drosophila*, 596

TAIT, DAVID E. N. Abandonment as a reproductive tactic—the example of grizzly bears, 800

TAMM, STAFFAN. See JON LOMAN

TAYLOR, ROBERT J., and PHILIP J. REGAL. Reply to Seib, 621

TURNER, MONTE E., and DUANE E. JEFFERY. *Drosophila pseudoobscura* of the Great Basin. II. Third chromosome arrangements of selected northern Utah populations, 771

VANDERMEER, JOHN, JAN LAZARUS, CRAIG LUDWIG, JOHN LYON, BRIAN SCHULTZ, and KATHERINE YIH. Migration as a factor in the community structure of a macroarthropod litter fauna, 606

VANNOTE, ROBIN L., and BERNARD W. SWEENEY. Geographic analysis of thermal equilibria: a conceptual model for evaluating the effect of natural and modified thermal regimes on aquatic insect communities, 667

WALKER, WILLIAM F. Sperm utilization strategies in nonsocial insects, 780

WHITE, JOANN. Resource partitioning by ovipositing cicadas, 1

WHITE, JOANN. See MONTE LLOYD

WHITE, RAYMOND R. See PAUL R. EHRLICH

WHITHAM, THOMAS G. The theory of habitat selection: examined and extended using *Pemphigus* aphids, 449

WHITT, GREGORY. See STEPHEN D. FERRIS

WILEY, R. HAVEN. See DOUGLAS G. RICHARDS

WINTERHALDER, BRUCE P. Canadian fur bearer cycles and Cree-Ojibwa hunting and trapping practices, 870

WITTENBERGER, JAMES F. Group size and polygamy in social mammals, 197

WOODLAND, D. J., ZARINAH JAAFAR, and MARY-LOU KNIGHT. The "pursuit deterrent" function of alarm signals, 748

YIH, KATHERINE. See JOHN VANDERMEER

Alphabetical Table of Contents of Titles

Abandonment as a reproductive tactic—the example of grizzly bears. David E. N. Tait, 800
Adaptive significance of midgut pH in larval Lepidoptera. M. Berenbaum, 138
The advantages of ectothermy for tetrapods. F. Harvey Pough, 92

Baja California: a peninsula for rodents but not for reptiles. Robert L. Seib, 613
British trees and insects: a test of the time hypothesis over the last 13,000 years. H. J. B. Birks, 600

Canadian fur bearer cycles and Cree-Ojibwa hunting and trapping practices. Bruce P. Winterhalder, 870
Clutch overlap and clutch size: alternative and complementary reproductive tactics. Nancy Burley, 223
Coadaptive gene complexes in incipient species of Hawaiian *Drosophila*. Alan T. Ohta, 121
Competitive exclusion. Robert A. Armstrong and Richard McGehee, 151
Cooperative and noncooperative behavior in animals. Ivan D. Chase, 827
Colorado checkerspot butterflies: isolation, neutrality, and the biospecies. Paul R. Ehrlich and Raymond R. White, 328
Cytogeometric constraints in *Tetrahymena* evolution: contractile vacuole pore positions in nineteen species on the *Tetrahymena pyriformis* complex. D. L. Nanney, D. Nyberg, S. S. Chen, and E. B. Meyer, 705

Delayed maturation in passerine plumages and the deceptive acquisition of resources. Sievert Rohwer, Stephen D. Fretwell, and David M. Niles, 400
Densities of floor-dwelling frogs and lizards in lowland forests of Southeast Asia and Central America. Robert F. Inger, 761
Did multicellular plants invade the land? G. L. Stebbins and G. J. C. Hill, 342
Do roosts serve as "information centers" for crows and ravens? Jon Loman and Staffan Tamm, 285
Drosophila pseudoobscura of the Great Basin II. Third chromosome arrangements of selected northern Utah populations. Monte E. Turner and Duane E. Jeffery, 771

Egg deposition patterns in butterflies: Why do some species cluster their eggs rather than deposit them singly? Nancy E. Stamp, 367
Erratum. Robert B. Payne, 149
An evolutionary and ecological perspective of the insect fauna of ferns. Stephen D. Hendrix, 171
Evolution of abilities to regenerate neurons in central nervous systems. C. E. Hulsebosch and G. D. Bittner, 276

Evolution of escape behavior diversity. Jos. J. Schall and Eric R. Pianka, 551
Evolution of receptor sensitivity to secondary plant substances with special reference to deterrents. V. G. Dethier, 45

Fitness uncertainty and the role of diversification in evolution and of behavior. Leslie A. Real, 623
Flocking and feeding in the great tit: a reply to Baker. John R. Krebs, 147
Food density and territory size: an alternative model and a test on the reef fish *Eupomacentrus leucostictus*. John P. Ebersole, 492
Food production and competitor density as the determinants of feeding territory size. Mark A. Hixon, 510

Genetic variability in species with extensive gene duplication: the tetraploid catostomid fishes. Stephen D. Ferris and Gregory Whitt, 650
Genetic variation and progressive evolution. David Layzer, 809
Geographic analysis of thermal equilibria: a conceptual model for evaluating the effect of natural and modified thermal regimes on aquatic insect communities. Robin L. Vannote and Bernard W. Sweeney, 667
Geographic dispersal and clonal diversity in unisexual fish populations. Robert A. Angus, 531
Group size and polygamy in social mammals. James F. Wittenberger, 197

MacArthur's minimization principle: a footnote. Ted J. Case, 133
Migration as a factor in the community structure of a macroarthropod litter fauna. John Vandermeer, Jan Lazarus, Craig Ludwig, John Lyon, Brian Schultz, and Katherine Yih, 606
Minority advantage of certain eye color mutants of *Drosophila melanogaster* II. A behavioral basis. Eliot B. Spiess and Johanna F. Kruckeberg, 307

Natural selection for variation in offspring numbers: comments on a paper by J. H. Gillespie. Gunnar Ekbohm, Torbjörn Fagerström, and Göran I. Ägren, 445
Niche width and genetic variation in *Drosophila* reexamined. James G. Hallett, 594

On niche width and genetic variation, parametrical problems, and gene pool differentiation in *Drosophila*. William W. M. Steiner, 596
On the improbability of pursuit invitation signals in mammals. Bruce E. Coblentz, 438
On estimating the primary sex ratio from incomplete data. Kent L. Fiala, 442
On reconciling patchy microspatial distributions with competition models. Monte Lloyd and JoAnn White, 29
Optimal foraging in glossophagine bats: when to give up. D. J. Howell and D. L. Hartl, 696
Origins of novel alkaloid types: a mechanism for rapid phenotypic evolution of plant secondary compounds. Doyle McKey, 754
The origins of slavery in leptothoracine ants (Hymenoptera: Formicidae). Thomas M. Alloway, 247

Population tracking of fluctuating environments and natural selection for

tracking ability. Mark S. Boyce and D. J. Daley, 480
The "pursuit deterrent" function of alarm signals. D. J. Woodland, Zarinah Jaafar, and Mary-Lou Knight, 748

Random mating in two species of *Drosophila*. Mark H. Gromko, Kathy Sheehan, and Rollin C. Richmond, 467
Reply to Seib. Robert J. Taylor and Philip J. Regal, 621
Reproductive value and rank relations among macaque sisters. Steven R. Schulman and Bernard Chapais, 580
Resource partitioning by ovipositing cicadas. JoAnn White, 1
Reverberations and amplitude fluctuations in the propagation of sound in a forest: implications for animal communication. Douglas G. Richards and R. Haven Wiley, 381

Sex and parthenogenesis in sparse populations. Jeroen Gerritsen, 718
Solar ultraviolet on tropical mountains: Can it affect plant speciation? David W. Lee and J. Brian Lowry, 771
Species packing in the salamander genus *Desmognathus*: What are the interspecific interactions involved? Nelson G. Hairston, 354
Sperm utilization strategies in nonsocial insects. William F. Walker, 780
Spite and altruism in gulls. Raymond Pierotti, 290
Stability in a one-predator–three-prey community. Roger A. Powell, 567
The stability of complex model ecosystems. Len Nunney, 639
Stabilization of a predator-prey equilibrium by the addition of a second "keystone" victim. Richard S. Inouye, 300
Stochastic dynamics of avian foraging flocks. Thomas Caraco, 262
The strategy of the red algal life history. Richard B. Searles, 113
Studies of oogenesis in natural populations of Drosophilidae II. Significance of microclimatic changes on oogenesis of *Drosophila mimica*. M. P. Kambysellis, T. Starmer, G. Smathers, and W. B. Heed, 67

The theory of habitat selection: examined and extended using *Pemphigus* aphids. Thomas G. Whitham, 449
Turnover noise: contribution to variance in species number and prediction from immigration and extinction curves. Jared M. Diamond and Michael E. Gilpin, 884

Variation in nestling sex ratios in the yellow-headed blackbird. Cindy B. Patterson and J. Merritt Emlen, 743

When doves conspire: evolution of nondamaging fighting tactics in a nonrandom-encounter animal conflict model. Robert M. Fagen, 761

Apparent chromosomal heterosis in a fossorial mammal. John C. Patton, Robert J. Baker, and Hugh H. Genoways, 143

Are competition coefficients constant? Inductive versus deductive approaches. Peter Abrams, 730

Barking in a primitive ungulate, *Muntiacus reevesi*: function and adaptiveness. Richard H. Yahner, 157

Behavioral interactions between parasites and hosts: host suicide and the evolution of complex life cycles. Deborah R. Smith Trail, 77

Call form in relation to function in the Steller's jay. Sylvia Hope, 788

Clonal niche structure in the parthenogenetic earthworm *Octolasion tyrtaeum*. John Jaenike, E. Davis Parker, Jr., and Robert K. Selander, 196

Cone predation by pinyon cone beetle (*Conothorus edulis*: Scolytidae): dependence on frequency and magnitude of cone production. Frank Forcella, 594

The costs of reproduction and their consequences. Graham Bell, 45

Cumulative scaling of paternalistic behavior in primates. Kevin B. Bales, 454

Do parasitoids of Lepidoptera larvae compete for hosts? No evidence. John M. Dean and Robert E. Ricklefs, 882

Do parasitoids of Lepidoptera larvae compete for hosts? Probably! Don C. Force, 873

Energy flow in a salt marsh ecosystem: the role of reduced inorganic sulfur compounds. Robert W. Howarth and John M. Teal, 862

Enzyme polymorphism and adaptive strategy in the decapod Crustacea. Keith Nelson and Dennis Hedgecock, 238

The evolution and decay of overdominance during the evolution of gynodioecy, subdioecy, and dioecy. M. D. Ross, 607

The evolution of eusociality in termites: a haplodiploid analogy? Robert C. Lacy, 449

The evolution of hairlessness in man. James A. Kushlan, 727

The evolution of thallus form and survival strategies in benthic marine macroalgae: field and laboratory tests of a functional form model. Mark M. Littler and Diane S. Littler, 25

An experimental study of parental investment and polygyny in male blackbirds. Cindy B. Patterson, W. James Erckmann, and Gordon H. Orians, 757

Experiments on cuckoldry in the mountain bluebird. Harry W. Power and Christopher G. P. Doner, 689

Female polymorphism and sexual reproduction in the rotifer *Asplanchna*: evolution of their relationship and control by dietary tocopherol. John J. Gilbert, 409

Flash synchronization as tool and as enabler in firefly courtship competition. John B. Buck and Elisabeth Buck, 591

Food habits, energetics, and the population biology of mammals. Brian K. McNab, 106

Foraging costs and relative prey size. David Griffiths, 743

Frequency-dependent selection, disruptive selection, and the evolution of reproductive isolation. Daniel Udovic, 621

Genetic differences within and between populations of the major human subgroups. B. D. H. Latter, 220

Genetic variation and phenotypic evolution during allopatric speciation. Russell Lande, 463

Genetic variation in a heterogeneous environment. VIII. Temporal and spatial heterogeneity in haploid populations. Evelyn Pritchett-Ewing, 885
Geographic variation in components of mating success of the housefly, *Musca domestica* L., in the United States. Edwin H. Bryant, 655
Ground squirrel alarm calls: nepotism or parental care? William M. Shields, 599
Growth, distribution, and competition of *Tribolium castaneum* and *Tribolium brevicornis* in fine-grained habitats. D. F. Jillson and R. F. Costantino, 206

Hosts as islands. Armand M. Kuris, Andrew R. Blaustein, and José Javier Alió, 570

Implications of different sorts of evidence for competition. James D. Thomson, 719
Indirect mutualism: variations on a theme by Stephen Levine. John Vandermeer, 441
The influence of environmental gradients on ecosystem stability. O. L. Smith, 1
Insect flight times and atmospheric hydrocarbons. W. J. Freeland, 736
Intrapopulational morphological variation as a predictor of feeding behavior in deermice. Richard A. Smartt and Cliff Lemen, 891

The mammalian jaw mechanism—the high glenoid cavity. Walter S. Greaves, 432
The meaning of nepotism. Paul W. Sherman, 604
Minimal community structure: an explanation of species abundance patterns. George Sugihara, 770
Models of some ant-plant mutualisms. E. Raymond Heithaus, David C. Culver, and Andrew J. Beattie, 347

Niche packing and number of species. C. Rappoldt and P. Hogeweg, 480
A note on *K*-selection. Richard F. Green, 291

Of elephants and men: a discrete, stochastic model for long-lived species with complex life histories. Lilian Shiao-Yen Wu and Daniel B. Botkin, 831
On bluebird cuckoldry, human adultery, and the caricaturing of sociobiology. Harry W. Power, 705
On theories of flash synchronization in fireflies. Daniel Otte, 587
On the variability of alligator sex ratios. James D. Nichols and Robert H. Chabreck, 125
Optimal foraging for complementary resources. David J. Rapport, 324
Optimal foraging: partial consumption of prey. Andrew Sih, 281

Parasitoids and competition. Carl E. Bouton, Bruce A. McPheron, and Arthur E. Weis, 876
Patterns of fruit presentation and seed dispersal in bird-disseminated woody plants in the eastern deciduous forest. Edmund Stiles, 670
Patterns of plant species diversity in California: relation to weather and topography. Peter J. Richerson and Kwei-lin Lum, 504
Phenetic packing and community structure: a methodological comment. A. John Gatz, Jr., 147
Polygyny and decision theory: testing of a model in lark buntings (*Calamospiza melanocorys*). Wanda Pleszczynska and R. I. C. Hansell, 821
Population genetics of Mexican *Drosophila*. V. A high rate of multiple insemination in a natural population of *Drosophila pseudoobscura*. L. Levine, M. Asmussen, O. Olvera, J. R. Powell, M. E. de la Rosa, V. M. Salceda, M. I. Gaso, J. Guzman, and W. W. Anderson, 493

Quantitative analysis of directionality in mammalian karyotype evolution. Hirotami T. Imai and Ross H. Crozier, 537

The relationship between genome size and genetic variation. Benjamin Pierce and Jeffry B. Mitton, 850
Reply to Power. David P. Barash, 710
Resources: a graphical-mechanistic approach to competition and predation. David Tilman, 362

Saturation of bird communities in the West Indies. John W. Terborgh and John Faaborg, 178
Segregation distortion and male recombination in natural populations of *Drosophila melanogaster*. R. C. Woodruff and R. F. Lyman, 297
Sex investment ratios in social Hymenoptera. Robin Craig, 311
Sex ratios, parent-offspring conflict, and local competition for mates in the social wasps *Polistes metricus* and *Polistes variatus*. Robert A. Metcalf, 642
Sexual selection in mice. V. Reproductive competition between +/+ and +/t^{w5} males. Louis Levine, Robert F. Rockwell, and Joseph Grossfield, 150
Some consequences of diffuse competition in a desert ant community. D. W. Davidson, 92
Some numerical aspects of sexuality. G. de Jong, 712
Structure and stability in natural and randomly constructed competitive communities. Lawrence R. Lawlor, 394

The threespot damselfish: a noncarnivorous keystone species. Ann Houston Williams, 138

Why circadian rhythms? Kenneth R. Kramm, 452
Worker control of queen density in hymenopteran societies. Adrian Forsyth, 895

Zebra spiders may use uncorrelated asymmetries to settle contests. Alan R. Jacques and Lawrence M. Dill, 899
